

## MINIMIZING MINERAL SPOTS

**Dishwashers** - Lifesource systems retain nutrient minerals, which may result in limited spotting on glasses in dishwashers. Generally, Cascade Complete dishwasher detergent will resolve this issue. However, if you still have mineral spotting, try adding 1-2 tsp. of LemiShine or Sour Salt in the rinse cycle.

### **Do Not Use Pods**

They contain more detergent than needed.

**Fixtures & Chrome or Stainless Steel Surfaces** - Buildup of water spots on chrome fixtures and stainless steel sinks are easy to remove with Bar Keepers Friend or Pledge stainless steel wipes.

**Glass Shower Doors** - Shower doors show spots no matter what system you have. To prevent lime scale buildup from starting, simply buff shower doors with Rain-X or Amaz Water Stain Remover and squeegee regularly.
