“Putting the LifeSource Water System in our athletic complex was the best solution possible. The health benefit for our kids is phenomenal, and we save thousands of dollars not having to buy bottled water.” Jan Hethcock - Athletic Director, Oaks Christian School

Jan Hethcock with Beotron 4140 Water System

Jan Hethcock, the Athletic Director of Oaks Christian School was dealing with multiple water problems at his school. Hard water was taking a toll on their fixtures. The ice and tap water had an orange tint with bad taste and odors. Students and visitors would only drink bottled water- very expensive and certainly not good for the environment.

After installing LifeSource, the Maintenance Department saw a significant reduction in problems caused by hard water. Now, they have clean drinking water for the coaching staff and student athletes, in addition to clean, gentle water for the ice machines, whirlpools and showers.

Oaks Christian School, built in 1994, has an extensive list of facilities. The 110,000 sq.ft athletic complex offers 2 gyms, a fitness/weight room and a 3,500 sq.ft., olympic-size swimming pool. The department supports 45 teams that participate in more than 700 annual events. The department also includes a staff of 65 people, a team doctor, and two certified athletic trainers.
