

APAPURE12 SPEC SHEET

ApaPure12 Unit Summary

The LifeSource ApaPure12™ system, powered by Quantum Disinfection™ is engineered to be the ultimate disinfection unit for your home. Water simply has to pass over the Quantum Disinfection media surface and bacteria is instantly destroyed through a catalytic electronic exchange. ApaPure12 kills 99.9999% of bacteria and viruses on contact. This is a revolutionary, patented technology.

You just need to plumb the unit inline and turn the water on. It's that simple. No power. No chemicals. No maintenance. Just disinfected water for your entire home or business.

System Specifications

Certification Rating	200,000 gallons
Inlet	1" NPT
Outlet	1" NPT
Flow Rate	12 gpm
Dimensions	10" x 3"
Installation Space	20" on the cold water main
Pressure	min 20 - max 125 psi
Temperature	min 40°F - max 100°F
Certification	Ministry of Health China (MOH)
