# LIFE SOURCE

WATER SYSTEMS®

## TASTE & FEEL THE DIFFERENCE™

## WE TAKE THE WORRY OUT OF WATER

With a LifeSource Whole-House Water System® you can filter and condition water from every faucet in your home. LifeSource filters for clean, delicious water and conditions to reduce scale buildup caused by hard water.

## A COMPANY YOU CAN DEPEND ON

LifeSource Water produced the first Whole-House Water System® in 1984. As a family owned and operated company, we pride ourselves on our attentive, personalized customer service. Unlike dealers, you buy directly from our factory. We provide expertly trained service and installation teams. Call us...we answer the phone!

### TASTE THE DIFFERENCE

Transform your tap water into clean, great-tasting water from every faucet. No more expensive bottled water! Remove harmful chemicals like chlorine and chloramines and retain healthy minerals in your water – for a difference you can taste.

### 100% MAINTENANCE FREE

Our systems are 100% maintenance free. Say goodbye to salt, potassium chloride, filter changes, and monthly servicing. We install it; you forget about it. LifeSource Water Systems are safe and legal to use in areas where water softeners are banned.

### SOLVE YOUR HARD WATER PROBLEMS

The LifeSource System replaces water softeners, monthly exchange tanks, bottled water and reverse osmosis filters. Our new ScaleSolver products are proven to reduce hard water scale buildup without adding salt. The ScaleSolver is the eco-friendly alternative to water softeners.

### FEEL THE DIFFERENCE

Imagine softer, smoother skin and more manageable hair. You and your family can bathe and shower in water free of the drying and harmful effects of chlorine or chloramines.
